

RESEARCH

CBTBR featured in Science and on cover of Journal of Wildlife Diseases during February 2008

The article deals with the measures being implemented in South Africa to combat XDR TB and HIV. It focuses on the Brooklyn Chest hospital in Cape Town, Tugela Ferry district in KwaZulu-Natal and the new Airborne Infection Research facility in Witbank, Gauteng. Prof. Paul van Helden the CBTBR co-director comments on the DOTS drug protocols. ***(In South Africa, XDR TB and HIV Prove a Deadly Combination. Science 319, 894-897)***

A publication accepted by the Journal of Wildlife Diseases for the February 2008 issue, was featured on the front cover (see below).

The reference is as follows:

Paul D. van Helden, Nico C. Gey van Pittius, Robin M. Warren, Anita Michel, Tiny Hlokwé, Darshana Morar, Jacques Godfroid, Elizabeth C. du Plessis, and Roy Bengis (2008) Pulmonary Infection Due to *Mycobacterium goodii* in a Spotted Hyena (*Crocuta crocuta*) from South Africa. J Wildl Dis 44:151-154.
